

STREAMER

Pointguard

Streamer is a new product line within Pointguards selection of roof signs. With its unique, attractive and aerodynamic design (eco-friendly), it is our hope that the streamer will contribute positively to enhance our customers' brand and profile.

The space at the sides of the sign is primarily intended to make space for Taxi Company's telephone number which is the single most important communication message for a taxi business. The space at the sides can also be used for advertising if there is demand for it. Streamer is supposed to be fixed on the car roof with Pointguards specially designed magnetic fixing (see roof racks and fixings) but also other solutions like roof rack or side-mounted fixings are possible alternatives. Like many of our other roof signs Streamer comes with LED lighting which guarantee durability and a more attractive illumination.

Technical information:

Height: 140 mm
Length: 380 mm
Width: 200 mm
Material Top: Acrylic or PC (Polycarbonate)
Material baseplate: ABS

Colour: White or yellow
Illumination: LED - 18 pieces SMD LEDs,
Working voltage: 12 V
Power consumption: 240 mA
Fixing: Magnetic fixing - Other solutions available
